Klarna

Senior Python AI Engineer

Engineering · Milan · Full-time · €63,236 EUR - €70,825 EUR

Application

What you'll do

- Build AI-powered automation solutions: RFP generation, contract analysis, lead routing, supplier duplication checks, data extraction systems
- Own projects end-to-end in time-boxed phases: scoping (1-2 weeks) → building → deploying → monitoring
- Drive cross-functional collaboration with product, sales, legal, and ops teams to deliver business impact
- Present technical work and tradeoffs to senior leadership (CCO, GtM executives)
- Support and maintain what you build – no throwing projects over the wall
- Work publicly in Slack channels with radical transparency (all work visible to the team)

Who you are

- AI-First Engineer: Heavy hands-on experience with OpenAI/Anthropic APIs, prompt engineering, and AI-assisted coding tools (Claude, ChatGPT,
- Tech Stack Flexible: Comfortable working across Python, JavaScript, APIs, databases – you adapt to the problem, not the other way around
- Business-Oriented: You translate stakeholder needs into technical solutions and care about why we're solving a problem, not just how
- Iterative Shipper: You build MVPs in 1-2 week cycles, gather feedback, and iterate quickly
- Change Resilient: You thrive when priorities shift, requirements evolve, and ambiguity is the norm
- Self-Driven: You proactively unblock yourself, drive projects forward, and communicate openly in public channels

Awesome to have

- Experience with FastAPI, RAG architectures, or vector databases
- Background working with cross-functional stakeholders in sales, legal, or commercial operations
- Track record of maintaining production systems while building new features
- Comfort working in highly transparent, documentation-heavy environments
- Experience killing or rescoping projects that aren't delivering value

Please include a CV in English.
