Klarna

Senior Software Engineer - Java

Engineering - Engineering · Milan · Full-time · €63,236 EUR - €70,824 EUR

Application

What you will do

• As a backend Java developer, you will work within a specific problem space critical to Klarna's current needs where you will design, develop, and deploy backend services with a focus on scalability, high availability, and low latency.
• Collaborate and grow in a dynamic and autonomous environment while working in small, agile, and cross-functional teams.
• Use the latest technologies to solve real problems for our customers at a massive scale.
• Be part of a team that takes full operational responsibility for the services you own, and potentially take part in an on-call rotation.
• Share your knowledge and build creative solutions while helping the team evolve best practices.

Who you are

• Extensive software development experience with one or more general-purpose programming languages, including but not limited to Java.
• Great problem-solving abilities.
• Working proficiency in English.

Awesome to have

• Experience with Java (latest versions).
• Familiarity with Spring and Spring Boot.
• Knowledge of Docker and Kubernetes.
• Experience with Kafka.
• Database experience in PostgreSQL, DynamoDB, and Elasticsearch.
• Familiarity with microservices architecture on AWS.

Please include a CV in English.
