Software Engineer - Screening

4250 - 5750 EUR Monthly + RSUs

Tallinn

Company Description

Wise is a global technology company, building the best way to move and manage the world's money.
Min fees. Max ease. Full speed.

Whether people and businesses are sending money to another country, spending abroad, or making and receiving international payments, Wise is on a mission to make their lives easier and save them money.

As part of our team, you will be helping us create an entirely new network for the world's money.
For everyone, everywhere.

More about our mission and what we offer.

Job Description

The team you'll be working with: Screening

The team is building a robust control framework to ensure the entire Wise product portfolio is covered with essential screening checks and prevent onboarding of sanctioned individuals, organisations and politically exposed people. We ensure that associated risks are thoroughly mitigated and that controls are functioning effectively.

We are scaling our operations team and developing solutions to support them, ensuring that alerts are accurately checked and fully auditable. We are enhancing the customer experience, making it easy and convenient for customers to provide the necessary information and

documents.

You'll work directly with our back-office and compliance teams to understand how they work and what challenges they face. Then you'll redesign and build better internal tools for case handling and management - tools that are easy to use, efficient, and can grow with us.

Your work will improve both our internal processes and what customers experience, making a real difference to how smoothly we operate. You'll also team up with our regional and growth teams to make FinCrime and screening tools easier to implement across all our markets.

Our main vision points are:

- We want to fight financial crime, not just comply with requirements
- Run comprehensive screening checks across all products and use cases
- Ensure an invisible and frictionless experience for our customers
- Near-real time performance requirements for data processing
- Automation of manual processes: if some process logic can be described, it can be automated

Qualifications

What does it take?

- A strong product mindset, you prioritise work with the customers and operational teams in mind and make data-driven decisions
- Great communication skills and the ability to articulate complex, technical concepts to non-technical audience
- You have 4+ years of Java 8+ knowledge, experience with Spring framework, event streaming platforms (e.g. Kafka) and microservice best practices
- You have 2+ years of experience working with modern frontend frameworks such as React (and Typescript) or similar
- Experience working with relational databases, query optimisation and designing

schemas

You enjoy writing testable code

Experience with CI/CD pipelines

Hands on knowledge of system integration patterns

You believe in and follow best coding practices, code reviews and open feedback

What does success look like?

You'll have onboarded and found your place through understanding your team and tribe vision and how you can contribute

You'll understand how our values can help you guide your work

You'll understand the reasons behind problematic payments, customer difficulties and how to go about solving them

You'll raise the automation level to enable scaling of screening solutions

You'll understand our customers and the impact our product makes in their lives

You'll identify technical challenges and opportunities and help us build a world class money transfer product

Additional Information

For everyone, everywhere. We're people building money without borders — without judgement or prejudice, too. We believe teams are strongest when they are diverse, equitable and inclusive.

We're proud to have a truly international team, and we celebrate our differences. Inclusive teams help us live our values and make sure every Wiser feels respected, empowered to contribute towards our mission and able to progress in their careers.
