Support Team Leader (Remote)

Apply for this job

Apply for this job

Agile Lab is a company founded in 2014 with the mission to create value for its customers in data-intensive environments through customisable solutions that establish performance-driven processes, sustainable architectures and automated platforms based on data governance best practices.

Having delivered over 100 successful Elite Data Engineering initiatives, we have used this experience to create Witboost: a modular, technology-agnostic platform that enables modern organisations to discover, value and produce their data in both traditional environments and fully compliant Data Mesh architectures.

With a highly skilled team of over 260 data engineers based in Europe, Agile Lab helps organisations with their data-driven transformation.

Take a look at our **handbook** to discover our core values and processes.

💼 The opportunity:

We are looking for a Support Team Leader (SRE II) to join our growing team. You will play a key role in maintaining the reliability, observability, and operational efficiency of enterprise-level distributed systems.

In this role, you'll coordinate a small technical team (3–4 people) in managing microservices in complex production environments. You will be involved in m[illegible]ment, release coordination, and p[illegible]ong focus on **OpenShift** platforms.

Apply for this job

You'll also work closely with multiple cross-functional teams to ensure high availability and performance of our cloud-native services.

This role includes **on-call availability.**

💰 RAL:

40K-50K

💻 Responsibilities:

- Ensure high reliability of microservices running in **OpenShift / Kubernetes** environments
- Lead and coordinate a **technical team of 3–4 engineers** for operational excellence
- Manage incident resolution and ticketing workflows via **ServiceNow**
- Collaborate with development teams to drive **performance optimization and tuning**
- Design, configure and maintain **monitoring dashboards** (Grafana, Prometheus, etc.)
- Coordinate with Service Control Room to maintain effective alerting and response
- Oversee **release processes** of new features, hotfixes, and updates in production

🛠️ Requirements:

- Proven experie **nce Services (AMS)**: minimu

Apply for this job

- In-depth knowledge of **OpenShift / Kubernetes** and microservices in **cloud-native environments**
- Ability to **technically and operationally lead a team of 3–4 people**
- Experience in **release management, monitoring, and incident resolution**
- Excellent **communication and cross-functional coordination skills**
- Strong **initiative, operational autonomy**, and **results-oriented mindset**
- **Fluency in Italian**
- **Monitoring & Observability**: Grafana, Prometheus,
- **Cloud/DevOps**: OpenShift, GitLab, Jenkins
- **Ticketing & ITSM**: ServiceNow

🛠️ Requirements (Nice to Have):

- Degree in Computer Engineering, Computer Science, or a related field
- **Data & Messaging**: Kafka, MongoDB, Ignite
- **Monitoring & Observability**: Kibana, Jaeger, Datadog, OpenTelemetry

🙌🏻 We offer:

💻 Care about Wor

Apply for this job
